

Grow Great Campaign: Job Opportunity

Advert Date: 03 May 2024

Position: Data Capturer
Type: Short-term, full time contract (18 days)
Expected start date: End May 2024
Location: Midrand, Gauteng

Description:

Grow Great is a campaign with a mission to halve stunting in South Africa by 2030. Stunting is a largely preventable condition where young children are excessively short for their age and do not reach their full growth potential due to chronic nutritional deprivation, repeated infections and poor psychosocial stimulation. Stunting is associated with lifelong cognitive defects, educational and employment challenges, increased risk of chronic diseases in adulthood and cycles of intergenerational poverty.¹

The **Grow Great Campaign** was launched in 2018 in response to South Africa's persistently high levels of stunting. Our vision is *a future where no child is denied the opportunity to reach their full potential as a result of stunting and poor early childhood development in the first 1000 days of life*. We aim to mobilise the whole of South African society to support early childhood development and end stunting by mobilising stakeholders through data-driven advocacy, inspire the public through strategic mass media and communications, support parents through free mom and baby classes and empower practitioners through the Grow Great Champions community health worker programme.

Grow Great is seeking **six (6) able candidates** to form part of the study team that will capture client folders from the campaign's Grow Great Champions programme. The captured data will assist Grow Great to determine the impact of the GGC programme on maternal and child health and wellbeing.

Requirements:

- Proven experience as a Data Capturer or similar role
- Proficient in digital data entry and management
- Strong attention to detail and accuracy
- Excellent organizational skills
- Typing skills of at least 40 words per minute
- Ability to work independently and as part of a team

¹ Victoria C, Adair L, Fall C. Maternal and child undernutrition: consequences for adult health and human capital. Lancet 2008; 371(9606):340-357

- Knowledge of South Africa's data protection regulations, including POPIA
- Familiarity with data capturing software/tools
- Available for training and full time data capturing between 20 May – 14 June

Responsibilities:

- Capture data accurately and in a timely manner from approximately 1400 client folders, including clinical data on child growth and height
- Ensure data integrity and confidentiality
- Assist in data cleanup and verification processes
- Generate reports and summarise data as needed
- Collaborate with team members to ensure data accuracy and completeness

If you are passionate about data accuracy and making a positive impact, we would love to hear from you. Join us in our mission to grow greatness in our communities!

To apply, please send your CV (2 pages only) and a cover letter to amanda@growgreat.co.za before close of business on Monday, 13 May 2024.

Grow Great Campaign is an equal opportunity employer.
